Work Experience

Freelance Full Stack Software Developer @ Rosa

March 2025 – current | Brussels (remote)

- Develop and maintain scalable backend services using Node.js (NestJS) and MongoDB.
- Design and implement APIs to support our web and mobile applications.
- Optimize performance, security, and reliability of backend systems.
- Work in a mono-repo environment using Nx for seamless collaboration.
- Write and maintain unit tests (Jest), component tests (Storybook), and end-to-end tests (Cypress).
- Collaborate with a cross-functional team of developers, designers, and product managers.

Junior Full Stack Developer @ Brickbro

Sept 2023 – current | Barcelona (hybrid)

- Develop and maintain high quality and scalable front-end applications using Typescript, TailwindCSS and Next.JS.
- Build back-end services with Nest.JS, PostgreSQL, MongoDB, Golang and Python.
- Integrate third party APIs and enhance database queries performance.
- Follow agile methodologies for sprint planning, code reviews,...
- Contribute to implement CI/CD pipeline and cloud deployments on AWS.
